**NANOSCALE ANNOUNCES JAPANESE ODORKLENZ DISTRIBUTION AGREEMENT WITH MRT, INC.**

MANHATTAN, Kan., March 4, 2010 – NanoScale Corporation (NanoScale®), a leader in advanced chemistry products, services, and technologies, announced today the appointment of MRT, Inc. as their official OdorKlenz® distributor in Japan.

NanoScale's advanced scientific technologies are designed to remove and neutralize dangerous chemicals, as well as noxious and offensive odors. The OdorKlenz family of products utilizes the company's state-of-the-art core technology to target odors from a variety of sources such as VOCs, human and animal body waste (including body decomposition), pets, rotting foods, and can even address more complex problems like tobacco smoke and allergens. NanoScale has the added capabilities of customizing industrial or commercial solutions specific to the contaminants in airstreams or wastewater.

MRT, Inc. is a newly formed venture company that specializes in introducing new and innovative products to Customers throughout Japan. As NanoScale's official Distributor for all OdorKlenz products, MRT, Inc. will be able to address the marketing, advertising, distribution and support needs of the Japanese marketplace.

"We are very honored and excited to partner with MRT, Inc. Our selection was based on the vast business experience of their executive group and their proven record of dedication in meeting the needs of the Customer. Although, MRT, Inc. is a newly formed company, we believe that their dedication and commitment to excellence in business will facilitate a successful enterprise that will be instrumental in bringing innovative products to Customers," said Deborah Basco, NanoScale Vice President, International Sales and Distribution.

NanoScale Corporation develops and provides high performance advanced chemistry materials and related services to Customers worldwide. The Company holds a substantial intellectual property portfolio which includes its patented NanoActive®, FAST-ACT®, ChemKlenz®, OdorKlenz®, and SpillKlenz™ product lines and systems. NanoScale produces and sells a wide variety of NanoActive brand nanocrystalline materials in forms that include dry powders, granules, and liquid suspensions. FAST-ACT, ChemKlenz, and OdorKlenz Systems are sold for the prevention, containment, elimination, and remediation of toxic and noxious chemicals, odors, and related applications.
